Product Applications

The professional grade MS72B is a dual holster table-top stand ideal for comparison observations using the Dino-Lite digital microscopes. The holsters securely hold two Dino-Lite handheld digital microscopes enabling the user to compare two objects simultaneously or one object from two perspectives.

The Dino-Lite scopes can easily be removed from the holsters allowing for handheld use when desired. Each stand comes equipped with two independently activated, adjustable flex-arm LED lights mounted onto the base for enhanced lighting options. The precision machine crafted components provide smooth and accurate adjustment and multi-positional viewing. The MS72B is manufactured from durable, lightweight recycled aluminum and is easily set up and quickly disassembled making the versatile MS72B stand conveniently portable.
